

SAI AVINASH PASUMARTHY

SOFTWARE ENGINEER INTERN

Khammam | saiavinashpasumarthyy2005@gmail.com | 8179263417 | <https://linkedin.com/in/sai-avinash-pasumarthyy-143476291> | <https://github.com/saiavinashpasumarthyy>

PROFILE

Motivated Computer Science undergraduate with **hands-on experience in AI/ML and Full-stack Development**. Skilled in Python, MERN Stack, Machine Learning, RAG Systems, REST APIs, and MongoDB. Completed a 3-month AI/ML internship and currently developing a MERN-based College Portal with secure authentication and feedback management features. Strong problem-solving abilities with a passion for building scalable and innovative software solutions.

EDUCATION

SWARNA BHARATHI INSTITUTE OF SCIENCE AND TECHNOLOGY, Khammam B.Tech (C.S.E) - 8.03 CGPA	Aug 2023 to present
GITAM JUNIOR COLLEGE, TIRUPATI Board of Intermediate Education, Andhra Pradesh with 76.5%	Jun 2021 to Mar 2022
SRI SATYA SAI VIDYA VIHAR, PALASA, SRIKAKULAM Board of Secondary Education, Andhra Pradesh with 10.0 CGPA	Jun 2020 to Mar 2021

TECHNICAL PROFICIENCIES

- **Programming Languages:** Python, JavaScript, Java, SQL, HTML5/CSS3
- **Frameworks & Web:** React.js, Node.js, Express.js, FastAPI, Tailwind CSS, REST APIs
- **AI/ML & GenAI:** Machine Learning, RAG Systems, LangChain, LangGraph, LangSmith, NLP, TensorFlow, Scikit-learn
- **Databases & Vectors:** MongoDB, MySQL, SQLite, ChromaDB, Vector Databases
- **Tools & Platforms:** Git, GitHub, Postman, Uvicorn, VS Code
- **Core CS Concepts:** Data Structures & Algorithms (DSA), OOPs, DBMS, Operating Systems

PROJECTS

AI- RESUME SCREENING SYSTEM USING LANGCHAIN AND LANGSMITH • Built an AI-powered Applicant Tracking System (ATS) that automates resume screening, candidate ranking, and skill-gap analysis using LangChain pipelines, OpenAI LLMs, and LangSmith monitoring. Tech Stack: Python LangChain OpenAI API Streamlit	Apr 2026 to May 2026
RAG - BASED CUSTOMER SUPPORT ASSISTANT • Built a RAG (Retrieval Augmented Generation)-based Customer Support Assistant using LangGraph and ChromaDB that performs semantic document retrieval, automated query resolution, and Human-in-the-Loop escalation for complex customer requests. Tech Stack: Python LangGraph LangChain ChromaDB SentenceTransformers OpenAI API FastAPI PyPDF Git GitHub	Apr 2026 to May 2026
SBIT WEBSITE – MERN BASED WEBSITE Khammam • Developing a full-stack College Portal using MongoDB, Express.js, React.js, and Node.js. • Implemented role-based authentication and authorization using JWT. • Built Student, Faculty, and Admin modules with secure access control. • Integrated a feedback system with Nodemailer for email notifications. Tech Stack: MongoDB Express.js React.js Node.js JWT Authentication bcrypt Nodemailer React Router Tailwind CSS REST APIs Git/GitHub	Aug 2025 to Dec 2025
CYBER ATTACK PREDICTION USING ML AND GEN AI • Developed an AI-powered cyber-attack prediction system using Machine Learning, Deep Learning, Explainable AI (XAI), and Generative AI to detect network anomalies and classify cyber threats with high accuracy. • Implemented an end-to-end prediction pipeline involving data preprocessing, feature engineering, model training (Random Forest, CNN, LSTM), performance evaluation, and real-time threat visualization using Python, TensorFlow, Scikit-learn, FastAPI, and Pandas. Tech Stack: Python TensorFlow Scikit-learn Pandas FastAPI CNN LSTM Random Forest	Mar 2026 to Apr 2026

PROFESSIONAL EXPERIENCE

Agentic AI Intern, INNOMATICS RESEARCH LAB

Feb 2026 to May 2026

Virtual Internship

- Developed and implemented Machine Learning and AI solutions
- Developed projects involving **RAG (Retrieval Augmented Generation)**, Semantic search, and customer support automation.
- Gained hands-on experience with **Python**, data processing, vector databases, and workflow orchestration.
- Built and debugged 3+ Agentic AI modules utilizing RAG and vector databases, reducing query resolution times during automated testing.

Full Stack Development Intern, UPSKILL CAMPUS

May 2026 to Present

Virtual Internship

- Developed a full-stack **Food Delivery Application** using the **MERN stack** by setting up the frontend with **React.js** and the backend with **Node.js**, **Express.js**, and **MongoDB**.
- Implemented **secure user authentication** with JWT, password hashing using bcrypt, role-based access (Customer, Restaurant Owner, Delivery Driver), and integrated frontend-backend API communication.
- Designed the application's initial architecture, configured React Router and Tailwind CSS, and resolved integration and validation issues through API testing and debugging.

LANGUAGES

English, Telugu, Hindi, Tamil

ACHIEVEMENTS

- Completed 2 industry internships in AI/ML and Full-Stack Development.
- Developed 7+ hands-on AI and Full-Stack projects.
- Specialized in RAG systems, LangChain, LangGraph, and MERN Stack development.
- Solved 50+ problems on LeetCode and 30+ on GFG on Data Structures & Algorithms

DECLARATION

I hereby declare that the information provided above is true and correct to the best of my knowledge and belief.
